

PVC Encapsulated Rungs

‘DEESA’ PVC Foot Steps is uniquely designed for underground water tanks, sewerage manholes, & overhead water tanks. This material is used instead of conventional Mild Steel /Cast Iron steps.

It offers superior resistance to all type of corrosive environmental characteristics of sanitary sewers. It also provides very tight grip for the safety of work men.

Specification & Material used

- The material is manufactured as per IS standards
- It consists of an MS rod of Size: 8mm, 10mm & 12mm
- We ensure the material is manufactured of Virgin PVC Material
- Standard size of 263 x 164 with desired thickness of rod required by customer
- Available colour orange/black

These PVC Foot Steps are very widely used by the Civil Contractors in underground / overhead water tanks, sewerage manhole, multi-storeyed buildings and so many other water filling places.
